

# Urbane Projects Site Safety

3rd February 2022

Dear Sub-Contractor,

Urbane Projects is committed to ensuring our sites are both safe and compliant.

## SITE SAFETY

Urbane Projects has introduced HazardCo to manage site safety across all our building sites. It is a user-friendly, app-based tool with a range of features to support you with the health and safety of yourself and your team whilst on an Urbane Projects construction site.

You will need to download the HazardCo app prior to working on an Urbane construction site as you will be required to scan the QR code every time you start / finish work. The QR code is located on the HazardCo board which will be erected at the entry point of every Urbane construction site. These boards will be installed at all Urbane Projects construction sites in the coming weeks.

**This is a fundamental requirement for our business to demonstrate sound site management.**

In addition to this we will be requesting you complete a SWMS (Safe Work Method Statements) for site and job specific high-risk activity.

All contractors can download the HazardCo app, available on Google Play for android users or on the App Store for iPhone users.

**Don't forget to scan the QR code located on the hazard board every time you enter and leave an Urbane Projects construction site.**

## COVID-19

The mandate for all those who enter an Urbane Projects construction site is to be double vaccinated for COVID-19 from 31st January 2022. HazardCo will ask each contractor, upon signing in, a range of checks in line with the current COVID-19 requirements.

It is imperative each of your employees are checking in on the HazardCo app when on an Urbane Projects construction site.

We also ask each of our contractors to ensure they have met their obligations to collect and maintain a record of the vaccination status of their direct employees. Please do not roster on or permit any of your employees onto an Urbane Projects construction site if they are not compliant with the mandatory vaccination requirements.

Every contractor should be prepared to show a WA Health Officer their COVID certificate upon request.

# Urbane Projects Site Safety

Thank you for your co-operation in ensuring our sites remain safe for our valued team of employees and sub-contractors.

Please do not hesitate to contact me directly should you have any queries regarding these site safety measures or any other matter.

Regards,
